DETAILED ACTION

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. The title is objected to as such is considered to be inaccurate. Specifically, there will inherently be some drag, and to state as title that drag is zero, is misleading and inaccurate.

The following title is suggested: Reduced drag surfboard.

2. Claim 1 is rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 (as best understood) is rejected under 35 U.S.C. 102(b) as being anticipated by Bennett.

Bennett discloses the claimed invention, including a raised textured bottom surface for the reduction of drag on watercraft, including surfboards.

Art Unit: 3617

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Johnson, III and Moran disclose textured bottom surfaces for drag reduction.
